

B2M Antibody
Catalog # ASC11683**Specification****B2M Antibody - Product Information**

Application	WB, IHC, IF
Primary Accession	P61769
Other Accession	NP_004039 , 4757826
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Calculated MW	Predicted: 13 kDa

Application Notes	Observed: 12 kDa KDa B2M antibody can be used for detection of B2M by Western blot at 1 - 2 µg/mL.
-------------------	--

B2M Antibody - Additional Information

Gene ID 567

Target/Specificity

B2M; B2M antibody is human reactive.

Reconstitution & Storage

B2M antibody can be stored at 4°C for three months and -20°C, stable for up to one year.

Precautions

B2M Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

B2M Antibody - Protein InformationName B2M ([HGNC:914](#))**Function**

Component of the class I major histocompatibility complex (MHC). Involved in the presentation of peptide antigens to the immune system. Exogenously applied M.tuberculosis EsxA or EsxA-EsxB (or EsxA expressed in host) binds B2M and decreases its export to the cell surface (total protein levels do not change), probably leading to defects in class I antigen presentation (PubMed:25356553).

Cellular Location

Secreted. Cell surface. Note=Detected in serum and urine (PubMed:1336137, PubMed:7554280). {ECO:0000269|PubMed:7554280, ECO:0000269|Ref.6}

B2M Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

B2M Antibody - Images

Western blot analysis of B2M in SK-N-SH cell lysate with B2M antibody at 1 $\mu\text{g}/\text{mL}$ in (A) the absence and (B) the presence of blocking peptide.

Immunohistochemistry of B2M in mouse brain tissue with B2M antibody 5 $\mu\text{g}/\text{mL}$.

Immunofluorescence of B2M in mouse brain tissue with B2M antibody at 20 µg/mL.

B2M Antibody - Background

B2M Antibody: Beta2-microglobulin (B2M) is a principal component of the Major Histocompatibility Complex (MHC) class I molecule, a ternary membrane protein complex that displays fragments derived from proteolyzed cytosolic proteins on the surface of cells for recognition by the surveillance immune system (1,2). B2M is involved in the presentation of peptide antigens to the immune system and plays a critically important role in immune system function (3). It is expressed on nearly all nucleated cells and contains one Ig-like C1-type (immunoglobulin-like) domain (2,3). Mutations in the Beta 2-microglobulin gene can enhance the progression of malignant melanoma and osteoarthropathy (4,5).
