

**THAP11 Antibody**  
Catalog # ASC11738**Specification**

---

**THAP11 Antibody - Product Information**

Application	<b>WB</b>
Primary Accession	<a href="#">O96EK4</a>
Other Accession	<a href="#">NP_065190</a> , <a href="#">40354197</a>
Reactivity	<b>Human, Mouse, Rat</b>
Host	<b>Rabbit</b>
Clonality	<b>Polyclonal</b>
Isotype	<b>IgG</b>
Calculated MW	<b>Predicted: 35 kDa</b>
Application Notes	<b>Observed: 38 kDa KDa</b> <b>THAP11 antibody can be used for detection of THAP11 by Western blot at 1 - 2 µg/ml.</b>

**THAP11 Antibody - Additional Information**Gene ID **57215****Target/Specificity**

THAP11; THAP11 antibody is human, mouse and rat reactive.

**Reconstitution & Storage**

THAP11 antibody can be stored at 4°C for three months and -20°C, stable for up to one year.

**Precautions**

THAP11 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**THAP11 Antibody - Protein Information****Name** THAP11**Function**

Transcriptional repressor that plays a central role for embryogenesis and the pluripotency of embryonic stem (ES) cells. Sequence-specific DNA-binding factor that represses gene expression in pluripotent ES cells by directly binding to key genetic loci and recruiting epigenetic modifiers (By similarity).

**Cellular Location**

Nucleus. Cytoplasm. Note=May be regulated by shuttling of the protein between the cytoplasm and nucleus.

**THAP11 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

#### THAP11 Antibody - Images

Western blot analysis of THAP11 in human brain tissue lysate with THAP11 antibody at 1 µg/ml.

#### THAP11 Antibody - Background

The THAP domain-containing protein 11 (THAP11), also known as Ronin, is an essential factor involved in embryonic stem (ES) cell pluripotency and cell growth (1). THAP 11 contains a THAP domain, a conserved DNA-binding domain common to many proteins associated with chromatin modification and gene expression silencing, and has striking similarity to the site-specific DNA-binding domain (DBD) of *Drosophila* P element transposases (2). THAP11 can also negatively regulate CD44 v6 expression through its interaction with the poly(rC) binding protein PCBP1 (3).
