

PDCL Antibody
Catalog # ASC11819**Specification**

PDCL Antibody - Product Information

| | |
|-------------------|-----------------------------------------------------------------------------------------------------------------------|
| Application | WB |
| Primary Accession | Q13371 |
| Other Accession | NP_005379 , 88758594 |
| Reactivity | Human, Mouse, Rat |
| Host | Rabbit |
| Clonality | Polyclonal |
| Isotype | IgG |
| Calculated MW | Predicted: 33 kDa |
| Application Notes | Observed: 35 kDa KDa PDCL antibody can be used for detection of PDCL by Western blot at 1 - 2 µg/ml. |

PDCL Antibody - Additional InformationGene ID **5082****Target/Specificity**

PDCL; PDCL antibody is human, mouse and rat reactive. At least two isoforms of PDCL are known to exist. PDCL antibody is predicted to not cross-react with other members of the PDCL protein family.

Reconstitution & Storage

PDCL antibody can be stored at 4°C for three months and -20°C, stable for up to one year.

Precautions

PDCL Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

PDCL Antibody - Protein Information**Name** PDCL**Synonyms** PHLOP1, PhLP1**Function**

Acts as a positive regulator of hedgehog signaling and regulates ciliary function. [Isoform 2]: Acts as a negative regulator of heterotrimeric G proteins assembly by trapping the preloaded G beta subunits inside the CCT chaperonin.

Cellular Location

Cell projection, cilium {ECO:0000250|UniProtKB:Q9DBX2}

PDCL Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

PDCL Antibody - Images

Western blot analysis of PDCL in K562 cell lysate with PDCL antibody at 1 μ g/ml.

PDCL Antibody - Background

Phosducin-like proteins (PhLPs) are a conserved family of proteins with thioredoxin-like domains that were initially identified as modulators of G protein signaling (1,2). PDCL is widely expressed in normal human tissues and may participate directly in the regulation of calcium-evoked exocytosis in adrenal medullary chromaffin cells (3). It is an ethanol-responsive modulator of heterotrimeric G proteins (4).
