

Anti-SHEEP SERUM (RABBIT) Antibody
Sheep Serum Antibody
Catalog # ASR3895

Specification

Anti-SHEEP SERUM (RABBIT) Antibody - Product Information

Host	Rabbit
Conjugate	Unconjugated
Target Species	Sheep
Reactivity	Sheep
Clonality	Polyclonal
Application	WB, E, IP, I, LCI
Application Note	Anti-Sheep serum antibody is suitable for western blotting, IP and for ELISA. Researchers should determine optimal titers for applications that are not stated below.
Physical State	Lyophilized
Buffer	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Immunogen	Anti-sheep serum antibody was produced by repeated immunizations with sheep serum proteins.
Reconstitution Volume	2.0 mL
Reconstitution Buffer	Restore with deionized water (or equivalent)
Preservative	0.01% (w/v) Sodium Azide

Anti-SHEEP SERUM (RABBIT) Antibody - Additional Information

Purity

Anti-Sheep Serum antibody was prepared from polyspecific antiserum by a delipidation and defibrination. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-rabbit serum and multiple precipitin arc against Sheep Serum.

Storage Condition

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Precautions Note

This product is for research use only and is not intended for therapeutic or diagnostic applications.

Anti-SHEEP SERUM (RABBIT) Antibody - Background

Anti-Sheep serum antibody detects sheep serum proteins. Serum proteins are those proteins remaining in portion of plasma after coagulation of blood, during which process the plasma protein fibrinogen is converted to fibrin and remains behind in the clot. Anti-Sheep serum antibody is ideal for investigators involved in Cell Signaling, cellular biology and Signal Transduction research.
