

# Anti-Pdcd4 pS457 (MOUSE) Monoclonal Antibody

Pdcd4 phospho S457 Antibody Catalog # ASR4190

## Specification

### Anti-Pdcd4 pS457 (MOUSE) Monoclonal Antibody - Product Information

Host Mouse

Conjugate Unconjugated Target Species Human

Reactivity Rat, Human, Mouse

Clonality Monoclonal Application WB, IHC, E, I, LCI

Application Note Anti-PDCD4 pS457 monoclonal antibody

has been tested by ELISA and western blotting and is suitable for

immunohistochemistry. Specific conditions for reactivity should be optimized by the

end user. Expect a band approximately 62

kDa in size corresponding to

phosphorylated Pdcd4 protein by western blotting in the appropriate cell lysate or extract. This phospho-specific monoclonal antibody reacts with human Pdcd4 pS457 and shows minimal reactivity by ELISA

against the non-phosphorylated form of the immunizing peptide.

Liquid (sterile filtered)

0.02 M Potassium Phosphate, 0.15 M

Sodium Chloride, pH 7.2

Immunogen

Anti-Pdcd4 phospho S457 Antibody was produced by repeated immunizations with a synthetic peptide corresponding to

residues surrounding Ser457 of the human

Pdcd4 protein.

Preservative 0.01% (w/v) Sodium Azide

## Anti-Pdcd4 pS457 (MOUSE) Monoclonal Antibody - Additional Information

**Gene ID 27250** 

**Physical State** 

Buffer

Other Names 27250

#### **Purity**

Pdcd4 phospho S457 Antibody was purified from concentrated tissue culture supernate by Protein A chromatography. This antibody is specific for human Pdcd4 protein phosphorylated at Ser457. A BLAST analysis was used to suggest cross-reactivity with Pdcd4 from human, mouse, rat and Xenopus based on 100% homology with the immunizing sequence. Cross-reactivity with Pdcd4 from other sources has not been determined.

**Storage Condition** 

Store Pdcd4 phospho S457 Antibody at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

#### **Precautions Note**

This product is for research use only and is not intended for therapeutic or diagnostic applications.

## Anti-Pdcd4 pS457 (MOUSE) Monoclonal Antibody - Protein Information

Name PDCD4

Synonyms H731

#### **Function**

Inhibits translation initiation and cap-dependent translation. May excert its function by hindering the interaction between EIF4A1 and EIF4G. Inhibits the helicase activity of EIF4A. Modulates the activation of JUN kinase. Down-regulates the expression of MAP4K1, thus inhibiting events important in driving invasion, namely, MAPK85 activation and consequent JUN-dependent transcription. May play a role in apoptosis. Tumor suppressor. Inhibits tumor promoter-induced neoplastic transformation. Binds RNA (By similarity).

#### **Cellular Location**

Nucleus {ECO:0000250|UniProtKB:Q61823}. Cytoplasm {ECO:0000250|UniProtKB:Q61823}. Note=Shuttles between the nucleus and cytoplasm (By similarity). Predominantly nuclear under normal growth conditions, and when phosphorylated at Ser-457 (PubMed:16357133)

### **Tissue Location**

Up-regulated in proliferative cells. Highly expressed in epithelial cells of the mammary gland. Reduced expression in lung cancer and colon carcinoma.

### Anti-Pdcd4 pS457 (MOUSE) Monoclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

## Anti-Pdcd4 pS457 (MOUSE) Monoclonal Antibody - Images

### Anti-Pdcd4 pS457 (MOUSE) Monoclonal Antibody - Background

Programmed cell death 4 (Pdcd4) is a novel tumor suppressor. Pdcd4 directly inhibits the helicase activity of eukaryotic translation initiation factor 4A (eIF4A), a component of the translation initiation complex. Pdcd4 also suppresses the transactivation of activator protein-1 (AP-1)-responsive promoters by c-Jun. Pdcd4 contains two Akt phosphoryl-ation sites, one at Ser67 and the other at Ser457. The phosphorylation of Pdcd4 by Akt causes nuclear translocation of

Pdcd4 and a significant decrease in the ability of Pdcd4 to interfere with the transactivation of AP-1-responsive promoters by c-Jun. Ideal for researchers involved in Cell Signaling, Cancer and Signal Transduction research.
