

Anti-TRANSFERRIN (Human Serum) (RABBIT) Antibody

Transferrin Antibody Catalog # ASR4979

Specification

Anti-TRANSFERRIN (Human Serum) (RABBIT) Antibody - Product Information

Host Rabbit

Conjugate Unconjugated

Target Species
Reactivity
Human
Clonality
Polyclonal

Application WB, IHC, E, I, LCI

Application Note Anti-Transferrin Antibody has been tested

in western blotting, ELISA and IHC. Researchers should determine optimal titers for applications that are not stated

below.

Physical State Lyophilized

Buffer 0.02 M Potassium Phosphate, 0.15 M

Sodium Chloride, pH 7.2

Immunogen Transferrin Antibody was produced by

repeated immunizations with human serum

Transferrin protein.

Reconstitution Volume 100 µL

Reconstitution Buffer Restore with deionized water (or

equivalent)

Preservative 0.01% (w/v) Sodium Azide

Anti-TRANSFERRIN (Human Serum) (RABBIT) Antibody - Additional Information

Gene ID 7018

Other Names

7018

Purity

Anti-Transferrin Antibody is an IgG fraction antibody purified from monospecific antiserum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Rabbit Serum as well as purified and partially purified Transferrin [Human Serum]. Cross reactivity against Transferrin from other tissues and species may occur but have not been specifically determined.

Storage Condition

Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Precautions Note

This product is for research use only and is not intended for therapeutic or diagnostic applications.

Anti-TRANSFERRIN (Human Serum) (RABBIT) Antibody - Protein Information

Name TF (HGNC:11740)

Function

Transferrins are iron binding transport proteins which can bind two Fe(3+) ions in association with the binding of an anion, usually bicarbonate. It is responsible for the transport of iron from sites of absorption and heme degradation to those of storage and utilization. Serum transferrin may also have a further role in stimulating cell proliferation. (Microbial infection) Serves as an iron source for parasite T.brucei (strain 427), which capture TF via its own transferrin receptor ESAG6:ESAG7 and extract its iron for its own use.

Cellular Location Secreted.

Tissue Location

Expressed by the liver and secreted in plasma.

Anti-TRANSFERRIN (Human Serum) (RABBIT) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Anti-TRANSFERRIN (Human Serum) (RABBIT) Antibody - Background

Transferrin Antibody detects transferrin protein. Transferrins are iron binding transport proteins which can bind two Fe3+ ions in association with the binding of an anion, usually bicarbonate. It is responsible for the transport of iron from sites of absorption and heme degradation to those of storage and utilization. Serum transferrin may also have a further role in stimulating cell proliferation. Anti-transferrin Antibody is ideal for investigators involved in Cell Signaling, Neuroscience and Signal Transduction research.
