

ADA Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a full length recombinant ADA.

Catalog # AT1040a

Specification

ADA Antibody (monoclonal) (M01) - Product Information

Application	WB
Primary Accession	P00813
Other Accession	BC040226
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG1 Kappa
Calculated MW	40764

ADA Antibody (monoclonal) (M01) - Additional Information

Gene ID 100

Other Names

Adenosine deaminase, Adenosine aminohydrolase, ADA, ADA1

Target/Specificity

ADA (AAH40226.1, 1 a.a. ~ 363 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

ADA Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

ADA Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)

- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

ADA Antibody (monoclonal) (M01) - Background

This gene encodes an enzyme that catalyzes the hydrolysis of adenosine to inosine. Various mutations have been described for this gene and have been linked to human diseases. Deficiency in this enzyme causes a form of severe combined immunodeficiency disease (SCID), in which there is dysfunction of both B and T lymphocytes with impaired cellular immunity and decreased production of immunoglobulins, whereas elevated levels of this enzyme have been associated with congenital hemolytic anemia.
