

APEX1 Antibody (monoclonal) (M02)

Mouse monoclonal antibody raised against a partial recombinant APEX1.

Catalog # AT1160a

Specification

APEX1 Antibody (monoclonal) (M02) - Product Information

Application	E
Primary Accession	P27695
Other Accession	NM_001641
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG1 Kappa
Calculated MW	35555

APEX1 Antibody (monoclonal) (M02) - Additional Information

Gene ID 328

Other Names

DNA-(apurinic or apyrimidinic site) lyase, 31--, APEX nuclease, APEN, Apurinic-apyrimidinic endonuclease 1, AP endonuclease 1, APE-1, REF-1, Redox factor-1, DNA-(apurinic or apyrimidinic site) lyase, mitochondrial, APEX1, APE, APE1, APEX, APX, HAP1, REF1

Target/Specificity

APEX1 (NP_001632, 219 a.a. ~ 318 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

APEX1 Antibody (monoclonal) (M02) is for research use only and not for use in diagnostic or therapeutic procedures.

APEX1 Antibody (monoclonal) (M02) - Protocols

Provided below are standard protocols that you may find useful for product applications.

APEX1 Antibody (monoclonal) (M02) - Background

Apurinic/aprimidinic (AP) sites occur frequently in DNA molecules by spontaneous hydrolysis, by DNA damaging agents or by DNA glycosylases that remove specific abnormal bases. AP sites are pre-mutagenic lesions that can prevent normal DNA replication so the cell contains systems to identify and repair such sites. Class II AP endonucleases cleave the phosphodiester backbone 5' to the AP site. This gene encodes the major AP endonuclease in human cells. Splice variants have been found for this gene; all encode the same protein.
