

**CD81 Antibody (monoclonal) (M01)**

Mouse monoclonal antibody raised against a partial recombinant CD81.

Catalog # AT1446a

**Specification**

---

**CD81 Antibody (monoclonal) (M01) - Product Information**

Application	E
Primary Accession	<a href="#">P60033</a>
Other Accession	<a href="#">BC002978</a>
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG1 Kappa
Calculated MW	25809

**CD81 Antibody (monoclonal) (M01) - Additional Information**

Gene ID 975

**Other Names**

CD81 antigen, 26 kDa cell surface protein TAPA-1, Target of the antiproliferative antibody 1, Tetraspanin-28, Tspan-28, CD81, CD81, TAPA1, TSPAN28

**Target/Specificity**

CD81 (AAH02978, 25 a.a. ~ 127 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

**Format**

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

**Storage**

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

**Precautions**

CD81 Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

**CD81 Antibody (monoclonal) (M01) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)

- [Flow Cytometry](#)
- [Cell Culture](#)

### CD81 Antibody (monoclonal) (M01) - Images

Detection limit for recombinant GST tagged CD81 is approximately 0.1ng/ml as a capture antibody.

### CD81 Antibody (monoclonal) (M01) - Background

The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. This encoded protein is a cell surface glycoprotein that is known to complex with integrins. This protein appears to promote muscle cell fusion and support myotube maintenance. Also it may be involved in signal transduction. This gene is localized in the tumor-suppressor gene region and thus it is a candidate gene for malignancies.
