

**DAF Antibody (monoclonal) (M01)**

Mouse monoclonal antibody raised against a partial recombinant DAF.

Catalog # AT1709a

**Specification**

---

**DAF Antibody (monoclonal) (M01) - Product Information**

Application	WB, E
Primary Accession	<a href="#">P08174</a>
Other Accession	<a href="#">NM_000574</a>
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG1 Kappa
Calculated MW	41400

**DAF Antibody (monoclonal) (M01) - Additional Information****Gene ID** 1604**Other Names**

Complement decay-accelerating factor, CD55, CD55, CR, DAF

**Target/Specificity**

DAF (NP\_000565, 35 a.a. ~ 134 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

**Dilution**

WB~~1:500~1000

**Format**

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

**Storage**

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

**Precautions**

DAF Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

**DAF Antibody (monoclonal) (M01) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

### DAF Antibody (monoclonal) (M01) - Images

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (36.74 KDa) .

DAF monoclonal antibody (M01), clone 1G3 Western Blot analysis of DAF expression in HeLa (Cat # AT1709a )

Western Blot analysis of CD55 expression in transfected 293T cell line by DAF monoclonal antibody (M01), clone 1G3.

Lane 1: CD55 transfected lysate(41.4 KDa).  
Lane 2: Non-transfected lysate.

Detection limit for recombinant GST tagged DAF is approximately 0.03ng/ml as a capture antibody.

Proximity Ligation Analysis of protein-protein interactions between LCK and CD55. HeLa cells were stained with anti-LCK rabbit purified polyclonal 1:1200 and anti-CD55 mouse monoclonal antibody 1:50. Each red dot represents the detection of protein-protein interaction complex, and nuclei were counterstained with DAPI (blue).

### DAF Antibody (monoclonal) (M01) - Background

This gene encodes a protein involved in the regulation of the complement cascade. The encoded glycoprotein is also known as the decay-accelerating factor (DAF); binding of DAF to complement proteins accelerates their decay, disrupting the cascade and preventing damage to host cells. Antigens present on the DAF glycoprotein constitute the Cromer blood group system (CROM). Two alternatively spliced transcripts encoding different proteins have been identified. The predominant transcript encodes a membrane-bound protein expressed on cells exposed to plasma component proteins but an alternatively spliced transcript produces a soluble protein present at much lower levels. Additional, alternatively spliced transcript variants have been described, but their biological validity has not been determined.
