

GLS Antibody (monoclonal) (M01)
Mouse monoclonal antibody raised against a partial recombinant GLS.
Catalog # AT2211a

Specification

GLS Antibody (monoclonal) (M01) - Product Information

Application	IF, WB, E
Primary Accession	O94925
Other Accession	NM_014905
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG2a Kappa
Calculated MW	73461

GLS Antibody (monoclonal) (M01) - Additional Information

Gene ID 2744

Other Names

Glutaminase kidney isoform, mitochondrial, GLS, K-glutaminase, L-glutamine amidohydrolase, GLS, GLS1, KIAA0838

Target/Specificity

GLS (NP_055720, 580 a.a. ~ 669 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB ~ 1:500 ~ 1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

GLS Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

GLS Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)

- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

GLS Antibody (monoclonal) (M01) - Images

Immunofluorescence of monoclonal antibody to GLS on HeLa cell. [antibody concentration 10 ug/ml]

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (35.64 KDa) .

Detection limit for recombinant GST tagged GLS is approximately 0.3ng/ml as a capture antibody.

GLS Antibody (monoclonal) (M01) - Background

Sahai (1983) [PubMed 6825316] demonstrated phosphate-activated glutaminase (EC 3.5.1.2) in

human platelets. It is the major enzyme yielding glutamate from glutamine. Significance of the enzyme derives from its possible implication in behavior disturbances in which glutamate acts as a neurotransmitter (Prusiner, 1981). High heritability of platelet glutaminase was indicated by studies of Sahai and Vogel (1983) [PubMed 6682827] who found an intraclass correlation coefficient of 0.96 for monozygotic twins and 0.53 for dizygotic twins.
