

GPT Antibody (monoclonal) (M04)

Mouse monoclonal antibody raised against a full length recombinant GPT.

Catalog # AT2255a

Specification

GPT Antibody (monoclonal) (M04) - Product Information

Application	E
Primary Accession	P24298
Other Accession	BC018207
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG1 Kappa
Calculated MW	54637

GPT Antibody (monoclonal) (M04) - Additional Information

Gene ID 2875

Other Names

Alanine aminotransferase 1, ALT1, Glutamate pyruvate transaminase 1, GPT 1, Glutamic--alanine transaminase 1, Glutamic--pyruvic transaminase 1, GPT, AAT1, GPT1

Target/Specificity

GPT (AAH18207.1, 1 a.a. ~ 496 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

GPT Antibody (monoclonal) (M04) is for research use only and not for use in diagnostic or therapeutic procedures.

GPT Antibody (monoclonal) (M04) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)

- [Flow Cytometry](#)
- [Cell Culture](#)

GPT Antibody (monoclonal) (M04) - Images

Detection limit for recombinant GST tagged GPT is approximately 3ng/ml as a capture antibody.

GPT Antibody (monoclonal) (M04) - Background

This gene encodes cytosolic alanine aminotransaminase 1 (ALT1); also known as glutamate-pyruvate transaminase 1. This enzyme catalyzes the reversible transamination between alanine and 2-oxoglutarate to generate pyruvate and glutamate and, therefore, plays a key role in the intermediary metabolism of glucose and amino acids. Serum activity levels of this enzyme are routinely used as a biomarker of liver injury caused by drug toxicity, infection, alcohol, and steatosis. A related gene on chromosome 16 encodes a putative mitochondrial alanine aminotransaminase.

GPT Antibody (monoclonal) (M04) - References

Higher levels of alanine aminotransferase within the reference range predict unhealthy metabolic phenotypes of obesity in normoglycemic first-degree relatives of patients with type 2 diabetes mellitus.
