

GSDML Antibody (monoclonal) (M06)

Mouse monoclonal antibody raised against a full length recombinant GSDML.

Catalog # AT2271a

Specification

GSDML Antibody (monoclonal) (M06) - Product Information

Application	WB, E
Primary Accession	O8TAX9
Other Accession	BC025682
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG2b Kappa
Calculated MW	47348

GSDML Antibody (monoclonal) (M06) - Additional Information**Gene ID** 55876**Other Names**

Gasdermin-B, Gasdermin-like protein, GSDMB, GSDML

Target/Specificity

GSDML (AAH25682, 1 a.a. ~ 411 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

GSDML Antibody (monoclonal) (M06) is for research use only and not for use in diagnostic or therapeutic procedures.

GSDML Antibody (monoclonal) (M06) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)

- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

GSDML Antibody (monoclonal) (M06) - Images

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (70.95 kDa) .

GSDML monoclonal antibody (M06), clone 4C10 Western Blot analysis of GSDML expression in Jurkat ((Cat # AT2271a)

Detection limit for recombinant GST tagged GSDML is approximately 0.3ng/ml as a capture antibody.

GSDML Antibody (monoclonal) (M06) - Background

This gene encodes a member of the gasdermin-domain containing protein family. Other gasdermin-family genes are implicated in the regulation of apoptosis in epithelial cells, and are linked to cancer. Multiple transcript variants encoding different isoforms have been found for this gene. Additional variants have been described, but they are candidates for nonsense-mediated mRNA decay (NMD) and are unlikely to be protein-coding.

GSDML Antibody (monoclonal) (M06) - References
