

HFE Antibody (monoclonal) (M01)
Mouse monoclonal antibody raised against a partial recombinant HFE.
Catalog # AT2361a

Specification

HFE Antibody (monoclonal) (M01) - Product Information

| | |
|-------------------|---------------------------|
| Application | IF, WB, E |
| Primary Accession | Q30201 |
| Other Accession | NM_000410 |
| Reactivity | Human |
| Host | mouse |
| Clonality | Monoclonal |
| Isotype | IgG1 Kappa |
| Calculated MW | 40108 |

HFE Antibody (monoclonal) (M01) - Additional Information

Gene ID 3077

Other Names

Hereditary hemochromatosis protein, HLA-H, HFE, HLAH

Target/Specificity

HFE (NP_000401, 115 a.a. ~ 205 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

HFE Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

HFE Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)

- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

HFE Antibody (monoclonal) (M01) - Images

Immunofluorescence of monoclonal antibody to HFE on HeLa cell. [antibody concentration 10 ug/ml]

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (35.75 KDa) .

HFE monoclonal antibody (M01), clone 1G12. Western Blot analysis of HFE expression in A-431.

Western Blot analysis of HFE expression in transfected 293T cell line by HFE monoclonal antibody (M01), clone 1G12.

Lane 1: HFE transfected lysate(40.1 KDa).
Lane 2: Non-transfected lysate.

Detection limit for recombinant GST tagged HFE is approximately 0.03ng/ml as a capture antibody.

HFE Antibody (monoclonal) (M01) - Background

The protein encoded by this gene is a membrane protein that is similar to MHC class I-type proteins and associates with beta2-microglobulin (beta2M). It is thought that this protein functions to regulate iron absorption by regulating the interaction of the transferrin receptor with transferrin. The iron storage disorder, hereditary haemochromatosis, is a recessive genetic disorder that results from defects in this gene. At least nine alternatively spliced variants have been described for this gene. Additional variants have been found but their full-length nature has not been determined.
