

IHH Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a full length recombinant IHH.

Catalog # AT2497a

Specification

IHH Antibody (monoclonal) (M01) - Product Information

Application	WB
Primary Accession	O14623
Other Accession	BC034757
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG2a Kappa
Calculated MW	45251

IHH Antibody (monoclonal) (M01) - Additional Information**Gene ID** 3549**Other Names**

Indian hedgehog protein, IHH, HHG-2, Indian hedgehog protein N-product, Indian hedgehog protein C-product, IHH

Target/Specificity

IHH (AAH34757, 119 a.a. ~ 217 a.a) full length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

IHH Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

IHH Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)

- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

IHH Antibody (monoclonal) (M01) - Images

IHH monoclonal antibody (M01), clone 2G9 Western Blot analysis of IHH expression in Jurkat (Cat # L017V1).

IHH Antibody (monoclonal) (M01) - Background

This gene encodes a member of the hedgehog family of secreted signaling molecules. Hedgehog proteins are essential regulators of a variety of developmental processes including growth, patterning and morphogenesis. The encoded protein specifically plays a role in bone growth and differentiation. Mutations in this gene are the cause of brachydactyly type A1 which is characterized by shortening or malformation of the phalanges. Mutations in this gene are also the cause of acrocapitofemoral dysplasia.
