

IL10 Antibody (monoclonal) (M03)

Mouse monoclonal antibody raised against a partial recombinant IL10.

Catalog # AT2500a

Specification

IL10 Antibody (monoclonal) (M03) - Product Information

Application	WB
Primary Accession	P22301
Other Accession	NM_000572
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG3 Kappa
Calculated MW	20517

IL10 Antibody (monoclonal) (M03) - Additional Information**Gene ID** 3586**Other Names**

Interleukin-10, IL-10, Cytokine synthesis inhibitory factor, CSIF, IL10

Target/Specificity

IL10 (AAI04253.1, 74 a.a. ~ 178 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

IL10 Antibody (monoclonal) (M03) is for research use only and not for use in diagnostic or therapeutic procedures.

IL10 Antibody (monoclonal) (M03) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)

- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

IL10 Antibody (monoclonal) (M03) - Images

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (37.29 kDa) .

Western Blot analysis of IL10 expression in transfected 293T cell line by IL10 monoclonal antibody (M03), clone 1C10.

Lane 1: IL10 transfected lysate(20.5 kDa).
Lane 2: Non-transfected lysate.

IL10 Antibody (monoclonal) (M03) - Background

The protein encoded by this gene is a cytokine produced primarily by monocytes and to a lesser extent by lymphocytes. This cytokine has pleiotropic effects in immunoregulation and inflammation. It down-regulates the expression of Th1 cytokines, MHC class II Ags, and costimulatory molecules on macrophages. It also enhances B cell survival, proliferation, and antibody production. This cytokine can block NF-kappa B activity, and is involved in the regulation of the JAK-STAT signaling pathway. Knockout studies in mice suggested the function of this cytokine as an essential immunoregulator in the intestinal tract.
