Immunofluorescence of monoclonal antibody to KLF1 on HeLa cell. [antibody concentration 10 ug/ml]

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (31.79 KDa) .

Detection limit for recombinant GST tagged KLF1 is approximately 0.1ng/ml as a capture antibody.

**KLF1 Antibody (monoclonal) (M04) - Background**

This gene encodes a hematopoietic-specific transcription factor that induces high-level expression

of adult beta-globin and other erythroid genes. The zinc-finger protein binds to the DNA sequence CCACACCCT found in the beta hemoglobin promoter. Heterozygous loss-of-function mutations in this gene result in the dominant In(Lu) blood phenotype.
