NBN Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a partial recombinant NBN.
Catalog # AT2976a

Specification

NBN Antibody (monoclonal) (M01) - Product Information

Application	**WB, E**
Primary Accession	O60934
Other Accession	NM_002485
Reactivity	**Human**
Host	**mouse**
Clonality	**Monoclonal**
Isotype	**IgG2a Kappa**
Calculated MW	**84959**

NBN Antibody (monoclonal) (M01) - Additional Information

Gene ID 4683

Other Names
Nibrin, Cell cycle regulatory protein p95, Nijmegen breakage syndrome protein 1, NBN, NBS, NBS1, P95

Target/Specificity
NBN (NP_002476, 645 a.a. ~ 754 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution
WB~~1:500~1000

Format
Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage
Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions
NBN Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

NBN Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot

10320 Camino Santa Fe, Suite G
San Diego, CA 92121
Tel: 858.875.1900 Fax: 858.875.1999

- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

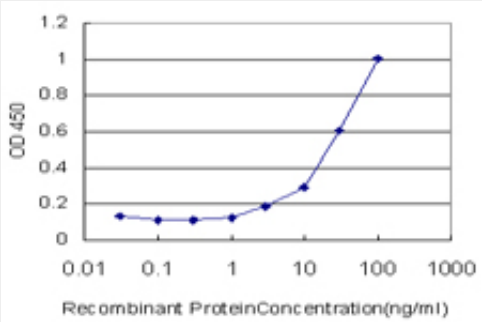
NBN monoclonal antibody (M01), clone 3E4 Western Blot analysis of NBN expression in HL-60 ((Cat # AT2976a)



Detection limit for recombinant GST tagged NBN is approximately 3ng/ml as a capture antibody.

NBN Antibody (monoclonal) (M01) - Background

Mutations in this gene are associated with Nijmegen breakage syndrome, an autosomal recessive chromosomal instability syndrome characterized by microcephaly, growth retardation, immunodeficiency, and cancer predisposition. The encoded protein is a member of the MRE11/RAD50 double-strand break repair complex which consists of 5 proteins. This gene product is thought to be involved in DNA double-strand break repair and DNA damage-induced checkpoint activation.
