

NBN Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a partial recombinant NBN.

Catalog # AT2976a

Specification

NBN Antibody (monoclonal) (M01) - Product Information

Application	WB, E
Primary Accession	O60934
Other Accession	NM_002485
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG2a Kappa
Calculated MW	84959

NBN Antibody (monoclonal) (M01) - Additional Information

Gene ID 4683

Other Names

Nibrin, Cell cycle regulatory protein p95, Nijmegen breakage syndrome protein 1, NBN, NBS, NBS1, P95

Target/Specificity

NBN (NP_002476, 645 a.a. ~ 754 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

NBN Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

NBN Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)

- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

NBN Antibody (monoclonal) (M01) - Images

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (37.84 kDa) .

NBN monoclonal antibody (M01), clone 3E4 Western Blot analysis of NBN expression in COLO 320 HSR ((Cat # AT2976a)

NBN monoclonal antibody (M01), clone 3E4 Western Blot analysis of NBN expression in HL-60 (Cat # AT2976a)

Detection limit for recombinant GST tagged NBN is approximately 3ng/ml as a capture antibody.

NBN Antibody (monoclonal) (M01) - Background

Mutations in this gene are associated with Nijmegen breakage syndrome, an autosomal recessive chromosomal instability syndrome characterized by microcephaly, growth retardation, immunodeficiency, and cancer predisposition. The encoded protein is a member of the MRE11/RAD50 double-strand break repair complex which consists of 5 proteins. This gene product is thought to be involved in DNA double-strand break repair and DNA damage-induced checkpoint activation.
