

PHB Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a full length recombinant PHB.

Catalog # AT3292a

Specification

PHB Antibody (monoclonal) (M01) - Product Information

Application	IF, WB, IHC, E
Primary Accession	P35232
Other Accession	BC013401
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG2a kappa
Calculated MW	29804

PHB Antibody (monoclonal) (M01) - Additional Information

Gene ID 5245

Other Names

Prohibitin, PHB

Target/Specificity

PHB (AAH13401, 1 a.a. ~ 272 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB ~ ~ 1:500 ~ 1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

PHB Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

PHB Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)

- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

PHB Antibody (monoclonal) (M01) - Images

Immunofluorescence of monoclonal antibody to PHB on HeLa cell. [antibody concentration 1 ~ 10 ug/ml]

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (55.66 KDa) .

PHB monoclonal antibody (M01), clone 3F4-2B2 Western Blot analysis of PHB expression in HeLa (Cat # AT3292a)

Immunoperoxidase of monoclonal antibody to PHB on formalin-fixed paraffin-embedded human colon adenocarcinoma. [antibody concentration 5 ug/ml]

Immunoperoxidase of monoclonal antibody to PHB on formalin-fixed paraffin-embedded human tonsil tissue.[antibody concentration 5 ug/ml]

Detection limit for recombinant GST tagged PHB is approximately 0.03ng/ml as a capture antibody.

PHB Antibody (monoclonal) (M01) - Background

Prohibitin is an evolutionarily conserved gene that is ubiquitously expressed. It is thought to be a negative regulator of cell proliferation and may be a tumor suppressor. Mutations in PHB have been linked to sporadic breast cancer. Prohibitin is expressed as two transcripts with varying lengths of 3' untranslated region. The longer transcript is present at higher levels in proliferating tissues and cells, suggesting that this longer 3' untranslated region may function as a trans-acting regulatory RNA.
