

WISP2 Antibody (monoclonal) (M09)

Mouse monoclonal antibody raised against a full length recombinant WISP2.

Catalog # AT4540a

Specification

WISP2 Antibody (monoclonal) (M09) - Product Information

Application	IP, WB
Primary Accession	O76076
Other Accession	BC017782
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG2a Kappa
Calculated MW	26825

WISP2 Antibody (monoclonal) (M09) - Additional Information

Gene ID 8839

Other Names

WNT1-inducible-signaling pathway protein 2, WISP-2, CCN family member 5, Connective tissue growth factor-like protein, CTGF-L, Connective tissue growth factor-related protein 58, WISP2, CCN5, CT58, CTGFL

Target/Specificity

WISP2 (AAH17782.1, 24 a.a. ~ 250 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

WISP2 Antibody (monoclonal) (M09) is for research use only and not for use in diagnostic or therapeutic procedures.

WISP2 Antibody (monoclonal) (M09) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)

- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

WISP2 Antibody (monoclonal) (M09) - Images

Immunoprecipitation of WISP2 transfected lysate using anti-WISP2 monoclonal antibody and Protein A Magnetic Bead ([U0007](#)), and immunoblotted with WISP2 MaxPab rabbit polyclonal antibody.

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (50.71 kDa) .

Western Blot analysis of WISP2 expression in transfected 293T cell line by WISP2 monoclonal antibody (M09), clone 3D10.

Lane 1: WISP2 transfected lysate(26.8 KDa).

Lane 2: Non-transfected lysate.

WISP2 Antibody (monoclonal) (M09) - Background

This gene encodes a member of the WNT1 inducible signaling pathway (WISP) protein subfamily, which belongs to the connective tissue growth factor (CTGF) family. WNT1 is a member of a family of cysteine-rich, glycosylated signaling proteins that mediate diverse developmental processes. The CTGF family members are characterized by four conserved cysteine-rich domains: insulin-like growth factor-binding domain, von Willebrand factor type C module, thrombospondin domain and C-terminal cystine knot-like (CT) domain. The encoded protein lacks the CT domain which is implicated in dimerization and heparin binding. It is 72% identical to the mouse protein at the amino acid level. This gene may be downstream in the WNT1 signaling pathway that is relevant to malignant transformation. Its expression in colon tumors is reduced while the other two WISP members are overexpressed in colon tumors. It is expressed at high levels in bone tissue, and may play an important role in modulating bone turnover.
