

ZWINT Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a full length recombinant ZWINT.

Catalog # AT4651a

Specification

ZWINT Antibody (monoclonal) (M01) - Product Information

| | |
|-------------------|--------------------------|
| Application | IF, WB, E |
| Primary Accession | O95229 |
| Other Accession | BC020979 |
| Reactivity | Human |
| Host | mouse |
| Clonality | Monoclonal |
| Isotype | IgG2a Kappa |
| Calculated MW | 31293 |

ZWINT Antibody (monoclonal) (M01) - Additional Information**Gene ID** 11130**Other Names**

ZW10 interactor, ZW10-interacting protein 1, Zwint-1, ZWINT

Target/Specificity

ZWINT (AAH20979, 1 a.a. ~ 277 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB ~ ~ 1:500 ~ 1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

ZWINT Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

ZWINT Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)

- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

ZWINT Antibody (monoclonal) (M01) - Images

Immunofluorescence of monoclonal antibody to ZWINT on HeLa cell. [antibody concentration 10 ug/ml]

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (56.21 KDa) .

ZWINT monoclonal antibody (M01), clone 6D3 Western Blot analysis of ZWINT expression in HeLa S3 NE ((Cat # AT4651a)

Detection limit for recombinant GST tagged ZWINT is approximately 0.03ng/ml as a capture antibody.

ZWINT Antibody (monoclonal) (M01) - Background

This gene encodes a protein that is clearly involved in kinetochore function although an exact role is not known. It interacts with ZW10, another kinetochore protein, possibly regulating the association between ZW10 and kinetochores. The encoded protein localizes to prophase kinetochores before ZW10 does and it remains detectable on the kinetochore until late anaphase. It has a uniform distribution in the cytoplasm of interphase cells. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.
