

**PE-Cy7 Anti-Human CD19 (SJ25C1) Antibody**  
Catalog # ATB10448

**Specification**

---

**PE-Cy7 Anti-Human CD19 (SJ25C1) Antibody - Product Information**

|               |  |
|---------------|--|
| Application   | FC   |
| Isotype       | Mouse IgG1, kappa  |
| Concentration | 5 µL (0.25 µg)/test  |
| Reactivity    | Human  |
| Formulation   | 10 mM NaH <sub>2</sub> PO <sub>4</sub> , 150 mM NaCl, 0.09% NaN <sub>3</sub> , 0.1% gelatin, pH7.2 |

**PE-Cy7 Anti-Human CD19 (SJ25C1) Antibody - Additional Information**

|                     |      |
|---------------------|------|
| Gene ID             | 930  |
| Gene Name           | CD19 |
| Alternative Name(s) |      |
| Leu-12, B4          |      |

**Format**  
PE-Cy7

**Storage Conditions**  
2-8°C protected from light

**PE-Cy7 Anti-Human CD19 (SJ25C1) Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

**PE-Cy7 Anti-Human CD19 (SJ25C1) Antibody - Images**

Human peripheral blood lymphocytes were stained with 5  $\mu$ L (0.125  $\mu$ g) PE-Cy7 Anti-Human CD19 (ATB10448) (solid line) or 0.125  $\mu$ g PE-Cy7 Mouse IgG1 isotype control (dashed line).

### PE-Cy7 Anti-Human CD19 (SJ25C1) Antibody - Background

The SJ25C1 antibody reacts with human CD19, a 95 kDa glycoprotein which acts as a co-receptor, along with CD21 (CR2), CD81 (TAPA-1) and CD225 (Leu13), in support of the functional B cell receptor (BCR). This complex provides antigen-specific recognition and subsequent activation of B cells to proliferate and differentiate into antibody-secreting cells (plasma cells) or memory B cells, which are crucial for secondary antigen encounter. Upon activation and tyrosine phosphorylation, the CD19 molecule can provide an anchor for cytoplasmic signaling proteins such as GRB2, SOS or PLCG2. CD19 is a lineage-differentiation marker, as its expression is detectable at the earliest B cell stages, through development, and is finally lost upon transition to mature plasma cells.

The SJ25C1 antibody is widely used as a phenotypic marker for CD19 expression on B cells, as well as on dendritic cell subsets
