

SEMA7A Antibody (N-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AW5121

Specification

SEMA7A Antibody (N-term) - Product Information

Application	WB,E
Primary Accession	O75326
Other Accession	O9OUR8
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal
Calculated MW	H=75;M=75 KDa
Isotype	Rabbit IgG
Antigen Source	Human

SEMA7A Antibody (N-term) - Additional Information

Gene ID 8482

Antigen Region
178-202

Other Names

SEMA7A;CD108; SEMAL; Semaphorin-7A; Semaphorin-7A; CDw108; Semaphorin-7A; JMH blood group antigen; Semaphorin-7A; John-Milton-Hargen human blood group Ag; Semaphorin-7A; Semaphorin-K1; Semaphorin-7A; Semaphorin-L; Semaphorin-7A; CD_antigen=CD108; Flags: Precursor

Dilution

WB~~1:1000

Target/Specificity

This SEMA7A antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 178-202 amino acids from the N-terminal region of human SEMA7A.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

SEMA7A Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

SEMA7A Antibody (N-term) - Protein Information

Name SEMA7A

Synonyms CD108, SEMAL

Function

Plays an important role in integrin-mediated signaling and functions both in regulating cell migration and immune responses. Promotes formation of focal adhesion complexes, activation of the protein kinase PTK2/FAK1 and subsequent phosphorylation of MAPK1 and MAPK3. Promotes production of pro-inflammatory cytokines by monocytes and macrophages. Plays an important role in modulating inflammation and T-cell-mediated immune responses. Promotes axon growth in the embryonic olfactory bulb. Promotes attachment, spreading and dendrite outgrowth in melanocytes.

Cellular Location

Cell membrane; Lipid-anchor, GPI-anchor; Extracellular side. Note=Detected in a punctate pattern on the cell membrane of basal and supra-basal skin keratinocytes

Tissue Location

Detected in skin keratinocytes and on endothelial cells from skin blood vessels (at protein level). Expressed in fibroblasts, keratinocytes, melanocytes, placenta, testis, ovary, spleen, brain, spinal chord, lung, heart, adrenal gland, lymph nodes, thymus, intestine and kidney.

SEMA7A Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

SEMA7A Antibody (N-term) - Images

Western blot analysis of lysates from human placenta, mouse spleen tissue lysate (from left to right), using SEMA7A Antibody (N-term) (Cat. #AW5121). AW5121 was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L (HRP) at 1:10000 dilution was used as the secondary antibody.

SEMA7A Antibody (N-term) - Background

Plays an important role in integrin-mediated signaling and functions both in regulating cell migration and immune responses. Promotes formation of focal adhesion complexes, activation of the protein kinase PTK2/FAK1 and subsequent phosphorylation of MAPK1 and MAPK3. Promotes production of proinflammatory cytokines by monocytes and macrophages. Plays an important role in modulating inflammation and T-cell-mediated immune responses. Promotes axon growth in the embryonic olfactory bulb. Promotes attachment, spreading and dendrite outgrowth in melanocytes.
