

**AGR2 Antibody (Center)**  
**Affinity Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AW5165**

**Specification**

---

**AGR2 Antibody (Center) - Product Information**

Application	WB,E
Primary Accession	<a href="#">O95994</a>
Other Accession	<a href="#">O88312</a> , <a href="#">Q5RZ65</a>
Reactivity	Human
Predicted	Zebrafish, Mouse
Host	Rabbit
Clonality	Polyclonal
Calculated MW	H=20;M=20;Z=20 KDa
Isotype	Rabbit IgG
Antigen Source	HUMAN

**AGR2 Antibody (Center) - Additional Information**

**Gene ID** 10551

**Antigen Region**  
95-124

**Other Names**

AGR2; AG2; Anterior gradient protein 2 homolog; HPC8; Secreted cement gland protein XAG-2 homolog

**Dilution**

WB~~ 1:1000

**Target/Specificity**

This AGR2 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 95-124 amino acids from the Central region of human AGR2.

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

AGR2 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

**AGR2 Antibody (Center) - Protein Information**

**Name** AGR2

**Synonyms** AG2

**Function**

Required for MUC2 post-transcriptional synthesis and secretion. May play a role in the production of mucus by intestinal cells (By similarity). Proto-oncogene that may play a role in cell migration, cell differentiation and cell growth. Promotes cell adhesion (PubMed:<a href="http://www.uniprot.org/citations/23274113" target="\_blank">23274113</a>).

**Cellular Location**

Secreted. Endoplasmic reticulum {ECO:0000250|UniProtKB:O88312}

**Tissue Location**

Expressed strongly in trachea, lung, stomach, colon, prostate and small intestine. Expressed weakly in pituitary gland, salivary gland, mammary gland, bladder, appendix, ovary, fetal lung, uterus, pancreas, kidney, fetal kidney, testis, placenta, thyroid gland and in estrogen receptor (ER)-positive breast cancer cell lines

**AGR2 Antibody (Center) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

**AGR2 Antibody (Center) - Images**

Western blot analysis of lysates from ZR-75-1, HT29 cell line (from left to right), using AGR2 Antibody (Center)(Cat. #AW5165). AW5165 was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:5000 dilution was used as the secondary antibody.

Western blot analysis of lysates from MCF-7,HT-29 cell line (from left to right), using AGR2 Antibody (Center)(Cat. #AW5165). AW5165 was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:10000 dilution was used as the secondary antibody.

Western blot analysis of lysates from MCF-7,HT-29 cell line (from left to right), using AGR2 Antibody (Center)(Cat #AW5165). AW5165 was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:10000 dilution was used as the secondary antibody.

**AGR2 Antibody (Center) - Background**

Anterior gradient 2 (AGR2) is known as a cancer cell marker specifically up-regulated in response to depletion of serum and oxygen. AGR2 has been identified as a tumor marker in primary and secondary cancer lesions, and as a marker for detection of circulating tumor cells (CTCs). Elevated levels of AGR2 are known to increase the metastatic potential of cancer cells, but conditions leading to increased expression of AGR2 are not well understood.
