

BLMH Antibody (Center)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AW5205**Specification**

BLMH Antibody (Center) - Product Information

Application	IF, WB,E
Primary Accession	Q13867
Other Accession	P70645 , P13019 , Q8R016
Reactivity	Human, Mouse
Predicted	Rabbit, Rat
Host	Rabbit
Clonality	Polyclonal
Calculated MW	H=53;M=53;Rat=52 KDa
Isotype	Rabbit IgG
Antigen Source	Human

BLMH Antibody (Center) - Additional Information**Gene ID** 642**Antigen Region**
212-242**Other Names**
BLMH;Bleomycin hydrolase**Dilution**
IF~~1:25
WB~~1:1000**Target/Specificity**
This BLMH antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 212-242 amino acids from the Central region of human BLMH.**Format**
Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.**Storage**
Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.**Precautions**
BLMH Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.**BLMH Antibody (Center) - Protein Information**

Name BLMH

Function

The normal physiological role of BLM hydrolase is unknown, but it catalyzes the inactivation of the antitumor drug BLM (a glycopeptide) by hydrolyzing the carboxamide bond of its B-aminoalaninamide moiety thus protecting normal and malignant cells from BLM toxicity.

Cellular Location

Cytoplasm. Cytoplasmic granule. Note=Co-localizes with NUDT12 in the cytoplasmic granules.

BLMH Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

BLMH Antibody (Center) - Images

Fluorescent image of HeLa cells stained with BLMH Antibody (Center)(Cat#AW5205). AW5205 was diluted at 1:25 dilution. An Alexa Fluor 488-conjugated goat anti-rabbit IgG at 1:400 dilution was used as the secondary antibody (green). Cytoplasmic actin was counterstained with Alexa Fluor® 555 conjugated with Phalloidin (red).

BLMH Antibody (Center) (Cat. #AW5205) western blot analysis in CEM,HL-60 cell line lysates (35ug/lane).This demonstrates the BLMH antibody detected the BLMH protein (arrow).

Western blot analysis of lysates from K562 cell line,mouse stomach tissue lysate(from left to right), using BLMH Antibody (Center)(Cat. #AW5205). AW5205 was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:10000 dilution was used as the secondary antibody.

BLMH Antibody (Center) - Background

The normal physiological role of BLM hydrolase is unknown, but it catalyzes the inactivation of the antitumor drug BLM (a glycopeptide) by hydrolyzing the carboxamide bond of its B-aminoalaninamide moiety thus protecting normal and malignant cells from BLM toxicity (By similarity).
