Mouse Hoxa1 Antibody (Center)

Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AW5236

Specification

Mouse Hoxa1 Antibody (Center) - Product Information

Application	**WB,E**
Primary Accession	P09022
Other Accession	O08656, P49639
Reactivity	**Mouse**
Predicted	**Human, Rat**
Host	**Rabbit**
Clonality	**Polyclonal**
Calculated MW	**H=37;M=36;Rat=36 KDa**
Isotype	**Rabbit IgG**
Antigen Source	**MOUSE**

Mouse Hoxa1 Antibody (Center) - Additional Information

Antigen Region
191-219

Other Names
Hoxa1; Era-1; Hox-1.6; Hoxa-1; Homeobox protein Hox-A1; Early retinoic acid 1; Homeobox protein Hox-1.6; Homeoboxless protein ERA-1-399; Homeotic protein ERA-1-993

Dilution
WB~~1:1000

Target/Specificity
This Mouse Hoxa1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 191-219 amino acids from the Central region of mouse Hoxa1.

Format
Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage
Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions
Mouse Hoxa1 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

Mouse Hoxa1 Antibody (Center) - Protein Information

Name Hoxa1

Synonyms Era-1, Hox-1.6, Hoxa-1

Function
Sequence-specific transcription factor (PubMed:29465778). Regulates multiple developmental processes including brainstem, inner and outer ear, abducens nerve and cardiovascular development and morphogenesis as well as cognition and behavior (By similarity). Also part of a developmental regulatory system that provides cells with specific positional identities on the anterior-posterior axis. Acts on the anterior body structures. Seems to act in the maintenance and/or generation of hindbrain segments (By similarity). Activates transcription in the presence of PBX1A and PKNOX1 (PubMed:29465778). The homeoboxless ERA-1-399 protein could act as a competitive inhibitor of the ERA-1-993 protein by competing for interaction with regulatory protein(s) while being unable to bind to DNA.

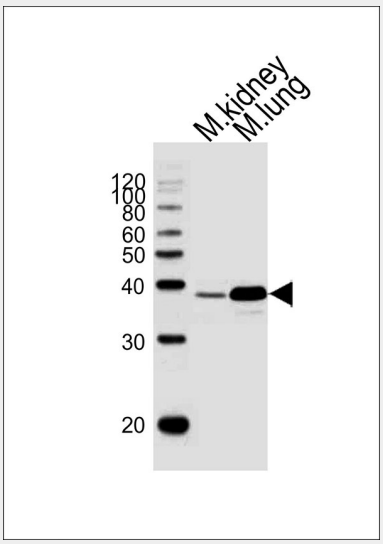
Cellular Location
Nucleus.

Mouse Hoxa1 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Mouse Hoxa1 Antibody (Center) - Images



Western blot analysis of lysates from mouse kidney,mouse lung tissue lysate (from left to right), using Hoxa1 Antibody (Center)(Cat. #AW5236). AW5236 was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:10000 dilution was used as the secondary antibody.

Mouse Hoxa1 Antibody (Center) - Background

Sequence-specific transcription factor which is part of a developmental regulatory system that provides cells with specific positional identities on the anterior-posterior axis. Acts on the anterior body structures. Seems to act in the maintenance and/or generation of hindbrain segments.
The homeobox domain presumably directs sequence-specific DNA binding. The N-terminal portion of ERA-1-993 may be involved in interactions with one or more other regulatory proteins. Such an interaction could regulate either the DNA-binding activity or the transcriptional regulatory activity of ERA-1-993.
The homeoboxless ERA-1-399 protein could act as a competitive inhibitor of the ERA-1-993 protein by competing for interaction with regulatory protein(s) while being unable to bind to DNA.
