## CARD6 Antibody (Center) - Images

Western blot analysis of lysates from A549, HepG2, A431, HL-60, THP-1 cell line (from left to right), using CARD6 Antibody (Center)(Cat. #AW5322). AW5322 was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:10000 dilution was used as the secondary antibody. Lysates at 20ug per lane.

Immunohistochemical analysis of paraffin-embedded H. skeletal muscle section using CARD6 Antibody (Center)(Cat#AW5322). AW5322 was diluted at 1:25 dilution. A undiluted biotinylated goat polyvalent antibody was used as the secondary, followed by DAB staining.

#### **CARD6 Antibody (Center) - Background**

CARD6 is a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible transcription factor NF- $\kappa$ B.
