#### Target/Specificity

This IL13RA1 antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 207-238 amino acids from the C-terminal region of human IL13RA1.

#### Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

#### Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### Precautions

IL13RA1 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

### IL13RA1 Antibody (C-term) - Protein Information

**Name** IL13RA1

## Synonyms IL13R, IL13RA

### Function

Binds with low affinity to interleukin-13 (IL13). Together with IL4RA can form a functional receptor for IL13. Also serves as an alternate accessory protein to the common cytokine receptor gamma chain for interleukin-4 (IL4) signaling, but cannot replace the function of IL2RG in allowing enhanced interleukin-2 (IL2) binding activity.

### Cellular Location

Membrane; Single-pass type I membrane protein.

### Tissue Location

Ubiquitous. Highest levels in heart, liver, skeletal muscle and ovary; lowest levels in brain, lung and kidney Also found in B-cells, T-cells and endothelial cells
