

SCP2 Antibody (C-term)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AW5423

Specification

SCP2 Antibody (C-term) - Product Information

Application	WB,E
Primary Accession	P22307
Other Accession	O62742 , P32020 , P07857
Reactivity	Human
Predicted	Bovine, Mouse, Rabbit
Host	Rabbit
Clonality	Polyclonal
Calculated MW	H=59,15,50,54,56;M=59,15;R=59,15 KDa
Isotype	Rabbit IgG
Antigen Source	HUMAN

SCP2 Antibody (C-term) - Additional Information

Gene ID 6342

Antigen Region
481-515

Other Names

Non-specific lipid-transfer protein, NSL-TP, Propanoyl-CoA C-acyltransferase, SCP-chi, SCPX, Sterol carrier protein 2, SCP-2, Sterol carrier protein X, SCP-X, SCP2

Dilution

WB~~1:1000

Target/Specificity

This SCP2 antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 481-515 amino acids from the C-terminal region of human SCP2.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

SCP2 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

SCP2 Antibody (C-term) - Protein Information

Name SCP2 ([HGNC:10606](#))

Function

[Isoform SCPx]: Plays a crucial role in the peroxisomal oxidation of branched-chain fatty acids (PubMed:10706581). Catalyzes the last step of the peroxisomal beta-oxidation of branched chain fatty acids and the side chain of the bile acid intermediates di- and trihydroxycoprostanic acids (DHCA and THCA) (PubMed:10706581). Also active with medium and long straight chain 3-oxoacyl-CoAs. Stimulates the microsomal conversion of 7-dehydrocholesterol to cholesterol and transfers phosphatidylcholine and 7-dehydrocholesterol between membranes, in vitro (By similarity). Isoforms SCP2 and SCPx cooperate in peroxisomal oxidation of certain naturally occurring tetramethyl- branched fatty acyl-CoAs (By similarity).

Cellular Location

[Isoform SCP2]: Peroxisome {ECO:0000250|UniProtKB:P32020}. Cytoplasm. Mitochondrion. Endoplasmic reticulum {ECO:0000250|UniProtKB:P32020}. Mitochondrion {ECO:0000250|UniProtKB:P32020}

Tissue Location

Liver, fibroblasts, and placenta.

SCP2 Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

SCP2 Antibody (C-term) - Images

All lanes : Anti-SCP2 Antibody (C-term) at 1:1000 dilution Lane 1: human liver lysates Lane 2: human placenta lysates Lysates/proteins at 20 µg per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution Predicted band size : 59 kDa Blocking/Dilution buffer: 5% NFDM/TBST.

SCP2 Antibody (C-term) - Background

Mediates in vitro the transfer of all common phospholipids, cholesterol and gangliosides between membranes. May play a role in regulating steroidogenesis.
