

**Presenilin 1 Antibody (C-term) [Knockout Validated]
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AW5708**

Specification

Presenilin 1 Antibody (C-term) [Knockout Validated] - Product Information

Application	IF, WB, IHC-P, FC,E
Primary Accession	P49768
Other Accession	P97887 , P49769 , Q8HXW5
Reactivity	Human
Predicted	Mouse, Rat, Monkey
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Source	HUMAN

Presenilin 1 Antibody (C-term) [Knockout Validated] - Additional Information

Gene ID 5663

Antigen Region
330-359

Other Names

Presenilin-1, PS-1, 3423-, Protein S182, Presenilin-1 NTF subunit, Presenilin-1 CTF subunit, Presenilin-1 CTF12, PS1-CTF12, PSEN1, AD3, PS1, PSNL1

Dilution

IF~~1:10~50
WB~~1:500-1:2000
IHC-P~~1:50~100
FC~~1:10~50

Target/Specificity

This Presenilin 1 (PSEN1) antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 330-359 amino acids from the C-terminal region of human Presenilin 1 (PSEN1).

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Presenilin 1 Antibody (C-term) [Knockout Validated] is for research use only and not for use in diagnostic or therapeutic procedures.

Presenilin 1 Antibody (C-term) [Knockout Validated] - Protein Information

Name PSEN1

Synonyms AD3, PS1, PSNL1

Function

Catalytic subunit of the gamma-secretase complex, an endoprotease complex that catalyzes the intramembrane cleavage of integral membrane proteins such as Notch receptors and APP (amyloid- beta precursor protein) (PubMed: [10206644](http://www.uniprot.org/citations/10206644)), PubMed: [10545183](http://www.uniprot.org/citations/10545183), PubMed: [10593990](http://www.uniprot.org/citations/10593990), PubMed: [10811883](http://www.uniprot.org/citations/10811883), PubMed: [10899933](http://www.uniprot.org/citations/10899933), PubMed: [12679784](http://www.uniprot.org/citations/12679784), PubMed: [12740439](http://www.uniprot.org/citations/12740439), PubMed: [15274632](http://www.uniprot.org/citations/15274632), PubMed: [20460383](http://www.uniprot.org/citations/20460383), PubMed: [25043039](http://www.uniprot.org/citations/25043039), PubMed: [26280335](http://www.uniprot.org/citations/26280335), PubMed: [28269784](http://www.uniprot.org/citations/28269784), PubMed: [30598546](http://www.uniprot.org/citations/30598546), PubMed: [30630874](http://www.uniprot.org/citations/30630874)). Requires the presence of the other members of the gamma-secretase complex for protease activity (PubMed: [15274632](http://www.uniprot.org/citations/15274632), PubMed: [25043039](http://www.uniprot.org/citations/25043039), PubMed: [26280335](http://www.uniprot.org/citations/26280335), PubMed: [30598546](http://www.uniprot.org/citations/30598546), PubMed: [30630874](http://www.uniprot.org/citations/30630874)). Plays a role in Notch and Wnt signaling cascades and regulation of downstream processes via its role in processing key regulatory proteins, and by regulating cytosolic CTNNB1 levels (PubMed: [10593990](http://www.uniprot.org/citations/10593990), PubMed: [10811883](http://www.uniprot.org/citations/10811883), PubMed: [10899933](http://www.uniprot.org/citations/10899933), PubMed: [9738936](http://www.uniprot.org/citations/9738936)). Stimulates cell-cell adhesion via its interaction with CDH1; this stabilizes the complexes between CDH1 (E-cadherin) and its interaction partners CTNNB1 (beta-catenin), CTNND1 and JUP (gamma-catenin) (PubMed: [11953314](http://www.uniprot.org/citations/11953314)). Under conditions of apoptosis or calcium influx, cleaves CDH1 (PubMed: [11953314](http://www.uniprot.org/citations/11953314)). This promotes the disassembly of the complexes between CDH1 and CTNND1, JUP and CTNNB1, increases the pool of cytoplasmic CTNNB1, and thereby negatively regulates Wnt signaling (PubMed: [11953314](http://www.uniprot.org/citations/11953314), PubMed: [9738936](http://www.uniprot.org/citations/9738936)). Required for normal embryonic brain and skeleton development, and for normal angiogenesis (By similarity). Mediates the proteolytic cleavage of EphB2/CTF1 into EphB2/CTF2 (PubMed: [17428795](http://www.uniprot.org/citations/17428795), PubMed: [28269784](http://www.uniprot.org/citations/28269784)). The holoprotein functions as a calcium-leak channel that allows the passive movement of calcium from endoplasmic reticulum to cytosol and is therefore involved in calcium homeostasis (PubMed: [16959576](http://www.uniprot.org/citations/16959576), PubMed: [25394380](http://www.uniprot.org/citations/25394380)). Involved in the regulation of neurite outgrowth (PubMed: [15004326](http://www.uniprot.org/citations/15004326), PubMed: [20460383](http://www.uniprot.org/citations/20460383)).

target="_blank">20460383). Is a regulator of presynaptic facilitation, spike transmission and synaptic vesicles replenishment in a process that depends on gamma-secretase activity. It acts through the control of SYT7 presynaptic expression (By similarity).

Cellular Location

Endoplasmic reticulum. Endoplasmic reticulum membrane; Multi-pass membrane protein. Golgi apparatus membrane; Multi-pass membrane protein. Cytoplasmic granule. Cell membrane; Multi-pass membrane protein. Cell projection, growth cone. Early endosome. Early endosome membrane; Multi-pass membrane protein. Cell projection, neuron projection. Cell projection, axon {ECO:0000250|UniProtKB:Q4JIM4}. Synapse {ECO:0000250|UniProtKB:Q4JIM4}. Note=Translocates with bound NOTCH1 from the endoplasmic reticulum and/or Golgi to the cell surface (PubMed:10593990). Colocalizes with CDH1/2 at sites of cell-cell contact. Colocalizes with CTNBN1 in the endoplasmic reticulum and the proximity of the plasma membrane (PubMed:9738936). Also present in azurophil granules of neutrophils (PubMed:11987239). Colocalizes with UBQLN1 in the cell membrane and in cytoplasmic juxtannuclear structures called aggresomes (PubMed:21143716).

Tissue Location

Detected in azurophilic granules in neutrophils and in platelet cytoplasmic granules (at protein level) (PubMed:11987239) Expressed in a wide range of tissues including various regions of the brain, liver, spleen and lymph nodes (PubMed:7596406, PubMed:8574969, PubMed:8641442).

Presenilin 1 Antibody (C-term) [Knockout Validated] - Protocols

Provided below are standard protocols that you may find useful for product applications.

Presenilin 1 Antibody (C-term) [Knockout Validated] - Images

Confocal immunofluorescent analysis of Presenilin 1 (PSEN1) Antibody (C-term)(Cat#AP6231a) with MDA-MB435 cell followed by Alexa Fluor 488-conjugated goat anti-rabbit IgG (green).DAPI was used to stain the cell nuclear (blue).

All lanes : Anti-PSEN1 Antibody (C-term) at 1:1000 dilution Lane 1: HeLa whole cell lysate Lane 2: HL-60 whole cell lysate Lysates/proteins at 20 μ g per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 53 kDa Blocking/Dilution buffer: 5% NFDm/TBST.

A dominant 59.6 kDa band and faint 87.6 kDa band for both the HeLa wild type and knock out lysates were observed (3 μ g/ml anti-PSEN1) vs the predicted size of 52.7 kDa. The molecular weight discrepancy could be due a post-translationally modified form of the target protein, a splice-variant form of the target protein, or an unrelated protein which shares the antibody-reactive epitope. The presence of bands in the knock out lysates suggest incomplete knockout of the target gene.

Formalin-fixed and paraffin-embedded human cancer tissue reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated. BC = breast carcinoma; HC = hepatocarcinoma.

Presenilin 1 (PSEN1) Antibody (C-term) (Cat. #AP6231a) flow cytometric analysis of Hela cells (right histogram) compared to a negative control cell (left histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

Presenilin 1 Antibody (C-term) [Knockout Validated] - Background

Alzheimer's disease (AD) patients with an inherited form of the disease carry mutations in the presenilin proteins (PSEN1; PSEN2) or the amyloid precursor protein (APP). These disease-linked mutations result in increased production of the longer form of amyloid-beta (main component of amyloid deposits found in AD brains). Presenilins are postulated to regulate APP processing through their effects on gamma-secretase, an enzyme that cleaves APP. Also, it is thought that the presenilins are involved in the cleavage of the Notch receptor, such that they either directly regulate gamma-secretase activity or themselves are protease enzymes.
