

CCDC110 Antibody (C-term) Blocking peptide
Synthetic peptide
Catalog # BP11757b

Specification

CCDC110 Antibody (C-term) Blocking peptide - Product Information

Primary Accession [Q8TBZ0](#)

CCDC110 Antibody (C-term) Blocking peptide - Additional Information

Gene ID 256309

Other Names

Coiled-coil domain-containing protein 110, Cancer/testis antigen 52, CT52, Cancer/testis antigen KM-HN-1, CCDC110, KMHN1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CCDC110 Antibody (C-term) Blocking peptide - Protein Information

Name CCDC110

Synonyms KMHN1

Cellular Location

Nucleus.

Tissue Location

Expressed specifically in testis. Also expressed in tumors of different origins.

CCDC110 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

CCDC110 Antibody (C-term) Blocking peptide - Background

This gene encodes a pentaspan transmembrane glycoprotein. The protein localizes to membrane protrusions and is often expressed on adult stem cells, where it is thought to function in maintaining stem cell properties by suppressing differentiation. Mutations in this gene have been shown to result in retinitis pigmentosa and Stargardt disease. Expression of this gene is also associated with several types of cancer. This gene is expressed from at least five alternative promoters that are expressed in a tissue-dependent manner. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq].
