

GGH Antibody (C-term) Blocking peptide
Synthetic peptide
Catalog # BP12045b

Specification

GGH Antibody (C-term) Blocking peptide - Product Information

Primary Accession [Q92820](#)

GGH Antibody (C-term) Blocking peptide - Additional Information

Gene ID 8836

Other Names

Gamma-glutamyl hydrolase, Conjugase, GH, Gamma-Glu-X carboxypeptidase, GGH

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

GGH Antibody (C-term) Blocking peptide - Protein Information

Name GGH ([HGNC:4248](#))

Function

Hydrolyzes the polyglutamate sidechains of pteroylpolyglutamates. Progressively removes gamma-glutamyl residues from pteroylpoly-gamma-glutamate to yield pteroyl-alpha-glutamate (folic acid) and free glutamate (PubMed: [11005824](http://www.uniprot.org/citations/11005824), PubMed: [8816764](http://www.uniprot.org/citations/8816764)). May play an important role in the bioavailability of dietary pteroylpolyglutamates and in the metabolism of pteroylpolyglutamates and antifolates.

Cellular Location

Secreted, extracellular space. Lysosome. Melanosome. Note=While its intracellular location is primarily the lysosome, most of the enzyme activity is secreted Identified by mass spectrometry in melanosome fractions from stage I to stage IV.

GGH Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

GGH Antibody (C-term) Blocking peptide - Background

This gene catalyzes the hydrolysis of polygamma-glutamates and antifolypoly-gamma-glutamates by the removal of gamma-linked polyglutamates and glutamate. [provided by RefSeq].
