

DNAH2 Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP16211a**Specification**

DNAH2 Antibody (N-term) Blocking Peptide - Product InformationPrimary Accession [O9P225](#)**DNAH2 Antibody (N-term) Blocking Peptide - Additional Information**

Gene ID 146754

Other Names

Dynein heavy chain 2, axonemal, Axonemal beta dynein heavy chain 2, Ciliary dynein heavy chain 2, Dynein heavy chain domain-containing protein 3, DNAH2, DNAHC2, DNHD3, KIAA1503

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

DNAH2 Antibody (N-term) Blocking Peptide - Protein InformationName DNAH2 ([HGNC:2948](#))

Synonyms DNAHC2, DNHD3, KIAA1503

Function

As part of the axonemal inner dynein arm complex plays a central role in ciliary beat (PubMed: [30811583](http://www.uniprot.org/citations/30811583)). Expressed in sperm flagellum, it is required for sperm motility (PubMed: [30811583](http://www.uniprot.org/citations/30811583)). Dyneins are microtubule-based molecular motors possessing ATPase activities that can convert the chemical energy of ATP into relative sliding between adjacent microtubule doublets to generate ciliary bending (PubMed: [30811583](http://www.uniprot.org/citations/30811583)).

Cellular Location

Cytoplasm, cytoskeleton, cilium axoneme {ECO:0000250|UniProtKB:P0C6F1}. Cytoplasm, cytoskeleton, flagellum axoneme

Tissue Location

Expressed primarily in trachea and testis, 2 tissues containing axonemal structures. Also

expressed in lung Expressed in spermatozoa (at protein level) (PubMed:31178125)

DNAH2 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

DNAH2 Antibody (N-term) Blocking Peptide - Background

Dyneins are microtubule-associated motor protein complexes composed of several heavy, light, and intermediate chains. The axonemal dyneins, found in cilia and flagella, are components of the outer and inner dynein arms attached to the peripheral microtubule doublets. DNAH2 is an axonemal inner arm dynein heavy chain (Chapelin et al., 1997 [PubMed 9256245]).
