

AGAP1 Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP16814a**Specification**

AGAP1 Antibody (N-term) Blocking Peptide - Product InformationPrimary Accession [Q9UPQ3](#)**AGAP1 Antibody (N-term) Blocking Peptide - Additional Information****Gene ID** 116987**Other Names**

Arf-GAP with GTPase, ANK repeat and PH domain-containing protein 1, AGAP-1, Centaurin-gamma-2, Cnt-g2, GTP-binding and GTPase-activating protein 1, GGAP1, AGAP1, CENTG2, KIAA1099

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

AGAP1 Antibody (N-term) Blocking Peptide - Protein Information**Name** AGAP1**Synonyms** CENTG2, KIAA1099**Function**

GTPase-activating protein for ARF1 and, to a lesser extent, ARF5. Directly and specifically regulates the adapter protein 3 (AP-3)- dependent trafficking of proteins in the endosomal-lysosomal system.

Cellular Location

Cytoplasm. Note=Associates with the endocytic compartment

Tissue Location

Widely expressed.

AGAP1 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

AGAP1 Antibody (N-term) Blocking Peptide - Background

CENTG2 belongs to an ADP-ribosylation factorGTPase-activating (ARF-GAP) protein family involved in membranetraffic and actin cytoskeleton dynamics (Nie et al., 2002 [PubMed12388557]).
