

SDOS Antibody (C-term) Blocking Peptide

Synthetic peptide
Catalog # BP5147b

Specification

SDOS Antibody (C-term) Blocking Peptide - Product Information

Primary Accession [O9BRJ7](#)

SDOS Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 84309

Other Names

Protein syndesmos, NUDT16-like protein 1, NUDT16L1, SDOS

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

SDOS Antibody (C-term) Blocking Peptide - Protein Information

Name NUDT16L1 ([HGNC:28154](#))

Function

Key regulator of TP53BP1 required to stabilize TP53BP1 and regulate its recruitment to chromatin (PubMed:[28241136](http://www.uniprot.org/citations/28241136)). In absence of DNA damage, interacts with the tandem Tudor-like domain of TP53BP1, masking the region that binds histone H4 dimethylated at 'Lys-20' (H4K20me2), thereby preventing TP53BP1 recruitment to chromatin and maintaining TP53BP1 localization to the nucleus (PubMed:[28241136](http://www.uniprot.org/citations/28241136)). Following DNA damage, ATM-induced phosphorylation of TP53BP1 and subsequent recruitment of RIF1 leads to dissociate NUDT16L1/TIRR from TP53BP1, unmasking the tandem Tudor-like domain and allowing recruitment of TP53BP1 to DNA double strand breaks (DSBs) (PubMed:[28241136](http://www.uniprot.org/citations/28241136)). Binds U8 snoRNA (PubMed:[18820299](http://www.uniprot.org/citations/18820299)).

Cellular Location

Nucleus.

SDOS Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

SDOS Antibody (C-term) Blocking Peptide - Background

SDOS is probable adapter protein, which may link syndecan-4 (SDC4) and paxilin (TGFB1I1 and PXN) receptors.
