

### XRCC1 Antibody (Center) Blocking peptide Synthetic peptide

Catalog # BP5545c

# Specification

# XRCC1 Antibody (Center) Blocking peptide - Product Information

Primary Accession Other Accession

#### P18887 NP 006288.2

# XRCC1 Antibody (Center) Blocking peptide - Additional Information

Gene ID 7515

Other Names DNA repair protein XRCC1, X-ray repair cross-complementing protein 1, XRCC1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

# XRCC1 Antibody (Center) Blocking peptide - Protein Information

Name XRCC1 {ECO:0000303|PubMed:2247054, ECO:0000312|HGNC:HGNC:12828}

Function

Scaffold protein involved in DNA single-strand break repair by mediating the assembly of DNA break repair protein complexes (PubMed:<a href="http://www.uniprot.org/citations/11163244" target="\_blank">11163244</a>, PubMed:<a href="http://www.uniprot.org/citations/28002403" target="\_blank">28002403</a>). Negatively regulates ADP- ribosyltransferase activity of PARP1 during base-excision repair in order to prevent excessive PARP1 activity (PubMed:<a href="http://www.uniprot.org/citations/28002403" target="\_blank">28002403</a>, PubMed:<a href="http://www.uniprot.org/citations/28002403" target="\_blank">28002403</a>, PubMed:<a href="http://www.uniprot.org/citations/28002403" target="\_blank">28002403</a>, PubMed:<a href="http://www.uniprot.org/citations/28002403" target="\_blank">34002403</a>, PubMed:<a href="http://www.uniprot.org/citations/28002403" target="\_blank">34002403</a>, PubMed:<a href="http://www.uniprot.org/citations/28002403" target="\_blank">34002403</a>, PubMed:<a href="http://www.uniprot.org/citations/28002403" target="\_blank">34002403</a>, PubMed:<a href="http://www.uniprot.org/citations/34102106" target="\_blank">34102106</a>, PubMed:<a href="http://www.uniprot.org/citations/34811483" target="\_blank">34811483</a>). Recognizes and binds poly-ADP-ribose chains: specifically binds auto-poly-ADP-ribosylated PARP1, limiting its activity (PubMed:<a href="http://www.uniprot.org/citations/34102106" target="\_blank">14500814" target="\_blank">14500814</a>, PubMed:<a href="http://www.uniprot.org/citations/34102106" target="\_blank">14500814"</a>

target="\_blank">34102106</a>, PubMed:<a href="http://www.uniprot.org/citations/34811483" target="\_blank">34811483</a>).

### **Cellular Location**

Nucleus. Chromosome Note=Moves from the nucleoli to the global nuclear chromatin upon DNA damage (PubMed:28002403). Recruited to DNA damage sites fowwing interaction with

poly-ADP-ribose chains (PubMed:14500814)

#### Tissue Location

Expressed in fibroblasts, retinal pigmented epithelial cells and lymphoblastoid cells (at protein level)

### XRCC1 Antibody (Center) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

### XRCC1 Antibody (Center) Blocking peptide - Background

The protein encoded by this gene is involved in the efficient repair of DNA single-strand breaks formed by exposure toionizing radiation and alkylating agents. This protein interacts with DNA ligase III, polymerase beta and poly (ADP-ribose)polymerase to participate in the base excision repair pathway. Itmay play a role in DNA processing during meiogenesis and recombination in germ cells. A rare microsatellite polymorphism inthis gene is associated with cancer in patients of varying radiosensitivity.
