

# CABC1 Antibody (N-term) Blocking Peptide

Synthetic peptide Catalog # BP7116a

# **Specification**

# CABC1 Antibody (N-term) Blocking Peptide - Product Information

Primary Accession

**08NI60** 

# CABC1 Antibody (N-term) Blocking Peptide - Additional Information

**Gene ID 56997** 

#### **Other Names**

Chaperone activity of bc1 complex-like, mitochondrial, Chaperone-ABC1-like, 2711-, aarF domain-containing protein kinase 3, ADCK3, CABC1

# **Target/Specificity**

The synthetic peptide sequence used to generate the antibody <a href=/product/products/AP7116a>AP7116a</a> was selected from the N-term region of human CABC1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

## **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

## CABC1 Antibody (N-term) Blocking Peptide - Protein Information

Name COQ8A {ECO:0000303|PubMed:27499294, ECO:0000312|HGNC:HGNC:16812}

# **Function**

Atypical kinase involved in the biosynthesis of coenzyme Q, also named ubiquinone, an essential lipid-soluble electron transporter for aerobic cellular respiration (PubMed:<a href="http://www.uniprot.org/citations/21296186" target="\_blank">21296186</a>, PubMed:<a href="http://www.uniprot.org/citations/25498144" target="\_blank">25498144</a>, PubMed:<a href="http://www.uniprot.org/citations/25540914" target="\_blank">25540914</a>, PubMed:<a href="http://www.uniprot.org/citations/27499294" target="\_blank">27499294</a>). Its substrate specificity is unclear: does not show any protein kinase activity (PubMed:<a href="http://www.uniprot.org/citations/25498144" target="\_blank">25498144</a>, PubMed:<a href="http://www.uniprot.org/citations/25498144" target="\_blank">25498144</a>, PubMed:<a href="http://www.uniprot.org/citations/27499294" target="\_blank">27499294</a>). Probably acts as a small molecule kinase, possibly a lipid kinase that phosphorylates a prenyl lipid in the ubiquinone biosynthesis pathway, as suggested by its ability to bind coenzyme Q lipid

intermediates (PubMed:<a href="http://www.uniprot.org/citations/25498144" target="\_blank">25498144</a>, PubMed:<a href="http://www.uniprot.org/citations/27499294" target="\_blank">27499294</a>). Shows an unusual selectivity for binding ADP over ATP (PubMed:<a href="http://www.uniprot.org/citations/25498144" target="\_blank">25498144</a>).

#### **Cellular Location**

Mitochondrion. Membrane; Single-pass membrane protein {ECO:0000255, ECO:0000305|PubMed:25216398}

### **Tissue Location**

Widely expressed, with highest levels in adrenal gland, heart, pancreas, nasal mucosa, stomach, uterus and skeletal muscle.

# CABC1 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

### Blocking Peptides

# CABC1 Antibody (N-term) Blocking Peptide - Background

CABC1 is one of several proteins for which expression is induced by p53 expression. The S. pombe homolog, ABC1, encodes a chaperone-like protein essential for the proper conformation and functioning of protein complexes in the respiratory chain.
