

IL-6
Catalog # PVGS1311**Specification**

IL-6 - Product Information

Primary Accession [Q75MH2](#)
Species
Human

Sequence
Pro29-Met212

Purity
> 95% as analyzed by SDS-PAGE

Endotoxin Level
≤ 0.2 EU/ µg of protein by gel clotting method

Biological Activity
ED₅₀ < 1.0 ng/ml, measured in a cell proliferation assay using TF-1 cells.

Expression System
CHO

Formulation **Lyophilized after extensive dialysis against PBS.**

Reconstitution
It is recommended that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Reconstitute the lyophilized powder in ddH₂O or PBS up to 100 µg/ml.

Storage & Stability
Upon receiving, this product remains stable for up to 6 months at lower than -70°C. Upon reconstitution, the product should be stable for up to 1 week at 4°C or up to 3 months at -20°C. Avoid repeated freeze-thaw cycles.

IL-6 - Additional Information

Target Background
Interleukin-6 (IL-6), also known as BSF-2, CDF and IFNB2, is a pleiotropic cytokine that acts in both pro-inflammatory and anti-inflammatory responses. It is produced mainly by T cells, macrophages, monocytes, endothelial cells and muscle cells. IL-6 binds to IL-6 receptor (IL-6R) to trigger the association of IL-6R with gp130, inducing signal transduction through JAKs and STATs. The biological functions of IL-6 are diverse. It stimulates B cell differentiation and antibody production, myeloma and plasmacytoma growth, as well as nerve cell differentiation. It also acts as a myokine, produced by muscle cells in response to muscle contraction, to be released to the blood stream to help break down fats and improve insulin resistance.

IL-6 - Protein Information

IL-6 - Protocols

Provided below are standard protocols that you may find useful for product applications.
