

MIP-1 β /CCL4
Catalog # PVGS1409**Specification**

MIP-1 β /CCL4 - Product InformationPrimary Accession [P13236-1](#)**Species**
Human**Sequence**
Ala24-Asn92**Purity**
> 95% as analyzed by SDS-PAGE
> 95% as analyzed by HPLC**Endotoxin Level**
< 0.2 EU/ μ g of protein by gel clotting method**Biological Activity**
The EC₅₀ value of human MIP-1 beta /CCL4 on Ca²⁺ mobilization assay in CHO-K1/ α 15/hCCR5 cells (human α 15 and human CCR5 stably expressed in CHO-K1 cells) is less than 100.0 ng/ml.**Expression System**
E. coliFormulation **Lyophilized after extensive dialysis against PBS.****Reconstitution**
It is recommended that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Reconstitute the lyophilized powder in ddH₂O or PBS up to 100 μ g/ml.**Storage & Stability**
Upon receiving, this product remains stable for up to 6 months at lower than -70°C. Upon reconstitution, the product should be stable for up to 1 week at 4°C or up to 3 months at -20°C. For long term storage it is recommended that a carrier protein (example 0.1% BSA) be added. Avoid repeated freeze-thaw cycles.**MIP-1 β /CCL4 - Additional Information****Target Background**
Macrophage inflammatory protein 1 beta (MIP-1 β), also known as Chemokine (C-C motif) ligand 4 (CCL4), is a small cytokine belonging to the CC chemokine family. It is a chemo attractant for natural killer cells, monocytes and a variety of other immune cells. MIP-1 β is a major HIV-suppressive factor produced by CD8⁺ T cells. Perforin-low memory CD8⁺ T cells are the most common T-cells that normally synthesize MIP-1-beta in humans. MIP-1 β has been shown to interact with CCL3. It can signal through the CCR5 receptor.
