

TGF-β2

Catalog # PVGS1557

Specification

TGF-β2 - Product Information

Primary Accession
Species
Human

P61812

Sequence

Ala303-Ser414

Purity

> 95% as analyzed by SDS-PAGE

Endotoxin Level

< 1 EU/ μg of protein by LAL method

Biological Activity

ED₅₀ < 0.2 ng/ml, measured in a cell proliferation assay using mouse HT-2 cells.

Expression System

Human Cells

Formulation

Lyophilized from a 0.2 μm filtered solution in 4 mM HCl.

Reconstitution

It is recommended that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Reconstitute the lyophilized powder in ddH_2O up to $100 \mu g/ml$.

Storage & Stability

Upon receiving, this product remains stable for up to 6 months at -70° C or -20° C. Upon reconstitution, the product should be stable for up to 1 week at 4° C or up to 3 months at -20° C. Avoid repeated freeze-thaw cycles.

TGF-β2 - Additional Information

Gene ID 7042

Other Names

Transforming growth factor beta-2 proprotein, Cetermin, Glioblastoma-derived T-cell suppressor factor, G-TSF, Latency-associated peptide, LAP, Transforming growth factor beta-2, TGF-beta-2, TGFB2

Target Background

Transforming growth factor beta-2 (TGF-β2) is a secreted protein which belongs to the TGF-beta family. It is known as a cytokine that performs many cellular functions and has a vital role during embryonic development. The precursor is cleaved into mature TGF-beta-2 and LAP, which remains non-covalently linked to mature TGF-beta-2 rendering it inactive. It is an extracellular glycosylated

protein. It is known to suppress the effects of interleukin dependent T-cell tumors. Defects in TGFB2 may be a cause of non-syndromic aortic disease (NSAD).

TGF-B2 - Protein Information

Name TGFB2

Function

[Transforming growth factor beta-2 proprotein]: Precursor of the Latency-associated peptide (LAP) and Transforming growth factor beta-2 (TGF-beta-2) chains, which constitute the regulatory and active subunit of TGF-beta-2, respectively.

Cellular Location

[Latency-associated peptide]: Secreted, extracellular space, extracellular matrix {ECO:0000250|UniProtKB:P01137}

TGF-β2 - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
