

#### MSLN/Mesothelin

Catalog # PVGS1735

# Specification

#### **MSLN/Mesothelin - Product Information**

Primary Accession Species

**Q13421-3** 

**Species** Human

Sequence

Glu296-Leu591

**Purity** 

> 95% as determined by Bis-Tris PAGE<br/>> > 95% as determined by HPLC

**Endotoxin Level** 

Less than 1EU per  $\mu g$  by the LAL method.

**Biological Activity** 

Immobilized MSLN/Mesothelin(296-591), His, Human (Cat.No.: Z03859) at 2  $\mu$ g/ml (100  $\mu$ l/Well) on the plate can bind Biotinylated Human CA125, His Tag.

**Expression System** 

**HEK293** 

**Theoretical Molecular Weight** 

34.48 kDa

Formulation Lyophilized from a 0.22 µm filtered solution in PBS, pH 7.4.

Reconstitution

Centrifuge the tube before opening. Reconstituting to a concentration more than 100  $\mu$ g/ml is recommended. Dissolve the lyophilized protein in distilled water.

Storage & Stability

Upon receiving, the product remains stable up to 6 months at -20 °C or below. Upon reconstitution, the product should be stable for 3 months at -80 °C. Avoid repeated freeze-thaw cycles.

### MSLN/Mesothelin - Additional Information

# **Target Background**

Mesothelin, also known as MSLN, is encoded by the MSLN gene. It encodes a precursor protein of 71 kDa that is processed to a 31 kDa shed protein called megakaryocyte potentiating factor (MPF) and a 40 kDa fragment, mesothelin. MSLN is attached to the cell membrane by a glycosyl-phosphatidylinositol (GPI) anchor. It is a differentiation antigen which is highly expressed in several human cancers, including virtually all mesotheliomas and pancreatic adenocarcinomas.

# **MSLN/Mesothelin - Protein Information**

# **MSLN/Mesothelin - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
