

**Anxiety Peptide**  
**Synthetic Peptide**  
**Catalog # SP2995b**

## Specification

---

### Anxiety Peptide - Product Information

Primary Accession [P31786](#)  
Other Accession [P11030](#)  
Sequence **NH2-QATVGDVNTDRPGLLDLK-COOH**

### Anxiety Peptide - Additional Information

**Gene ID** 13167

#### Other Names

Acyl-CoA-binding protein, ACBP, Diazepam-binding inhibitor, DBI, Endozepine, EP, Dbi

#### Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### Anxiety Peptide - Protein Information

**Name** Dbi

#### Function

Binds medium- and long-chain acyl-CoA esters with very high affinity and may function as an intracellular carrier of acyl-CoA esters. It is also able to displace diazepam from the benzodiazepine (BZD) recognition site located on the GABA type A receptor. It is therefore possible that this protein also acts as a neuropeptide to modulate the action of the GABA receptor.

#### Cellular Location

Endoplasmic reticulum {ECO:0000250|UniProtKB:P07108}. Golgi apparatus {ECO:0000250|UniProtKB:P07108}. Note=Golgi localization is dependent on ligand binding. {ECO:0000250|UniProtKB:P07108}
