

SARS-CoV-2 Nucleocapsid Protein Peptide (TRRIRGGDGKMKDLS)
Coronavirus Peptide
Catalog # VGP1920

Specification

SARS-CoV-2 Nucleocapsid Protein Peptide (TRRIRGGDGKMKDLS) - Product Information

| | |
|---------------------------------|---|
| Sequence | TRRIRGGDGKMKDLS |
| Purity >90% (HPLC-MS) | |
| Application | Cellular immune response, T-cell expansion, Antigen specific T-cell stimulation, Immune monitoring, T-cell assays |
| Primary Accession | P0DTC9 |

SARS-CoV-2 Nucleocapsid Protein Peptide (TRRIRGGDGKMKDLS) - Additional Information

| | |
|--|----------|
| Gene ID | 43740575 |
| Other Names Nucleoprotein, Nucleocapsid protein, NC, Protein N | |

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

SARS-CoV-2 Nucleocapsid Protein Peptide (TRRIRGGDGKMKDLS) - Background

SARS-CoV nucleocapsid protein is highly phosphorylated, basic, structural protein that forms a helical ribonucleoprotein complex with viral RNA, to form a complex that comprises the core structure of the SARS-CoV virion. SARS-CoV NP is thought to be involved in key viral life cycle functions including packaging, transcription, and replication, based on established functions of nucleocapsid proteins of other coronaviruses. SARS-CoV NP shows intrinsic multimerization and interacts with M protein, suggesting that NP is both critical to formation of the viral nucleocapsid core and participates in virion assembly.
