

SARS-CoV-2 Nucleocapsid Protein Peptide (LLLLDRLNQLESKMS)
Coronavirus Peptide
Catalog # VGP1933

Specification

SARS-CoV-2 Nucleocapsid Protein Peptide (LLLLDRLNQLESKMS) - Product Information

Sequence	LLLLDRLNQLESKMS
Purity >90% (HPLC-MS)	
Application	Cellular immune response, T-cell expansion, Antigen specific T-cell stimulation, Immune monitoring, T-cell assays
Primary Accession	P0DTC9

SARS-CoV-2 Nucleocapsid Protein Peptide (LLLLDRLNQLESKMS) - Additional Information

Gene ID	43740575
Other Names	Nucleoprotein, Nucleocapsid protein, NC, Protein N

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

SARS-CoV-2 Nucleocapsid Protein Peptide (LLLLDRLNQLESKMS) - Background

SARS-CoV nucleocapsid protein is highly phosphorylated, basic, structural protein that forms a helical ribonucleoprotein complex with viral RNA, to form a complex that comprises the core structure of the SARS-CoV virion. SARS-CoV NP is thought to be involved in key viral life cycle functions including packaging, transcription, and replication, based on established functions of nucleocapsid proteins of other coronaviruses. SARS-CoV NP shows intrinsic multimerization and interacts with M protein, suggesting that NP is both critical to formation of the viral nucleocapsid core and participates in virion assembly.
