

# SARS-CoV-2 Nucleocapsid Protein Peptide (LTYTGAIKLDDKDPN)

Coronavirus Peptide Catalog # VGP1944

### **Specification**

# SARS-CoV-2 Nucleocapsid Protein Peptide (LTYTGAIKLDDKDPN) - Product Information

Sequence LTYTGAIKLDDKDPN

**Purity** 

>90% (HPLC-MS)

Application Cellular immune response, T-cell

expansion, Antigen specific T-cell

stimulation, Immune monitoring, T-cell

assays

Primary Accession PODTC9

## SARS-CoV-2 Nucleocapsid Protein Peptide (LTYTGAIKLDDKDPN) - Additional Information

Gene ID 43740575

**Other Names** 

Nucleoprotein, Nucleocapsid protein, NC, Protein N

# **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

# SARS-CoV-2 Nucleocapsid Protein Peptide (LTYTGAIKLDDKDPN) - Background

SARS-CoV nucleocapsid protein is highly phosphorylated, basic, structural protein that forms a helical ribonucleoprotein complex with viral RNA, to form a comlex that comprises the core structure of the SARS-CoV virion. SARS-CoV NP is though to be involved in key viral life cycle functions including packaging, transcription, and replication, based on established functions of nucleocapside proteins of other coronaviruses. SARS-CoV NP shows intrinsic multimerization and interacts with M protein, suggesting that NP is both critical to formation of the viral nucleocapsid core and participates in virion assembly.
