

SARS-CoV-2 Nucleocapsid Protein Peptide (KTFPPTEPKKDKKKK)

Coronavirus Peptide Catalog # VGP1947

Specification

SARS-CoV-2 Nucleocapsid Protein Peptide (KTFPPTEPKKDKKKK) - Product Information

Sequence **Purity** >90% (HPLC-MS)

Primary Accession

KTFPPTEPKKDKKKK

Application

Cellular immune response, T-cell expansion, Antigen specific T-cell stimulation, Immune monitoring, T-cell assays <u>PODTC9</u>

SARS-CoV-2 Nucleocapsid Protein Peptide (KTFPPTEPKKDKKKK) - Additional Information

Gene ID 43740575 Other Names Nucleoprotein, Nucleocapsid protein, NC, Protein N

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

SARS-CoV-2 Nucleocapsid Protein Peptide (KTFPPTEPKKDKKKK) - Background

SARS-CoV nucleocapsid protein is highly phosphorylated, basic, structural protein that forms a helical ribonucleoprotein complex with viral RNA, to form a comlex that comprises the core structure of the SARS-CoV virion. SARS-CoV NP is though to be involved in key viral life cycle functions including packaging, transcription, and replication, based on established functions of nucleocapside proteins of other coronaviruses. SARS-CoV NP shows intrinsic multimerization and interacts with M protein, suggesting that NP is both critical to formation of the viral nucleocapsid core and participates in virion assembly.
